

CHATHAM PUBLIC LIBRARY

Training Policy

In order to provide the most up to date services for library patrons, all library staff should keep abreast of new trends and technologies in the library field. The Chatham Public Library will support opportunities to staff that enable them to keep up-to-date with upgrades and enhancements to its library system automation software and get information that they need to comply with the standards for resource sharing between libraries.

Additionally, it is optimal for the library director to attend library conferences necessary to remain current with issues in, and affecting, public librarianship.

Mileage reimbursement for Chatham Public Library employee training will be in accord with Chatham Central School District policies and procedures.

Cross ref: 6831 Expense Reimbursement
