

## Download & Install Sierra

1. Open an internet browser i.e. Firefox, Chrome, Edge, etc.
2. In the URL bar enter and go to [Sierra Installer web page](#)

3. Find the Platform that matches your Computer's Operating System and Click download.
4. When prompted by your browser select Save File.
5. Once the download is complete. Run the install file.
6. Once the Installation software has been downloaded to your computer and you open/run it, a pop-up window will walk you through the Sierra installation process. Click through the questions choosing where to install (default=desktop) and where to put shortcuts (default on desktop).

7. When prompted for the server enter midhudsonlibraries.org.
8. The program should install. Click "Done" when prompted.
9. Congratulations! Sierra is now installed on your computer.
