

Pre Sorting Tips for Member Libraries

Definition:

Pre Sorting is the process of separating items in transit for the remaining stops on your route from all outgoing items in transit.

Key Points to Remember:

1. Always Pre Sort for your next MHLS scheduled delivery day and remember to factor in MHLS holidays.
2. Use separate bins for materials returning to MHLS and Pre Sorted materials going to the remaining stops on your route. Individual Pre Sort bins for each stop remaining on the route are not needed and all Pre Sort materials can be placed together in one bin or bins. If you'd like to individually bundle or stack materials for each library remaining on the route in the Pre Sort bin that would be helpful but not necessary.
3. To differentiate between the MHLS and Pre Sort bins, a note can be placed on or near the Pre Sort bins.

Outgoing materials to MHLS
